

Pricing

To find out the price of your ring simply go to width of the ring you have chosen.

Then on the chart find the box on the left side of the chart that your finger size falls into.

Go along the row until it coincides with the metal of choice and the intersecting box will have the price of your Finger Print Wedding Ring.

For the 2 toned rings in Platinum or Palladium find the shape and dimensions you desire and then add \$500 for 9ct white gold inlay and \$800 for 18ct yellow gold inlay.

Please note that due to world wide fluxuations in gold and platinum prices these prices are only valid from the months indicated. If you do not order your ring within the time frame then you will need to contact Peter Gordon to get a current price list.
